# OIL GAS PETROCHEMICAL

*ENGINEERING, PROCUREMENT & CONSTRUCTION*

# AZTECH OGP GROUP

AZTECH OGP GROUP is Engineering, Procurement & Construction company (EPC) which specializes in the field of Oil, Natural Gas and Petrochemical. AZTECH continues its 15 year tradition of client based services, safety executed projects by providing construction management, EPC and turnaround execution to Oil & Gas clients throughout the world.

AZTECH Engineering is committed in designing a variety of products in oil and natural gas field. Under the expert guidance of our engineers, we can design any type of fabrication to suit your requirements.

AZTECH provides procurement services including sourcing of all project materials and services, assisting project managers with material specifications and descriptions and performing the purchasing functions for projects.

AZTECH success is based on delivering exceptional value over the lifecycle of our client's projects in the oil and natural gas field and achieving exceptional quality throughout the course of the project execution and construction. We deliver solutions in every region of the world under some of the most demanding conditions. When clients have difficult EPC challenges, they come to AZTECH for an expert advice. Whether we are providing EPC for a large facility, small capital construction, or a government building project, AZTECH will deliver exceptional service and performance.

## AZTECH PRODUCTS

# PIPING

### PROCESS PIPE

AZTECH can supply seamless & welded pipes for all of your projects from alloy steel, stainless steel and carbon steel and our years of experience as a global leader in diverse fields, enables AZTECH to successfully complete any project requirement, technical specifications and inspection services.

We can also help design systems for Natural Gas, Oil Fields, Specialized Manufacturing & Chemical Industries.

### VALVES

#### (HAND & GEAR OPERATED, MOV & ACTUATOR)

AZTECH offers solutions for all critical applications whether it's Natural Gas, Oil or Chemical Industries. The multi-discipline environments of such industries or the wide-range of valve products requires proper directional flow. While these industries may differ, they all share the requirement of quality control which we at AZTECH strive for in every step of the production.

AZTECH team has over 15 years of combined experience providing these solutions and does so by incorporating our knowledge in valve and in different control platforms. Our valve series includes: Gate, Globe, Ball, butterfly, checks, knives and needle valves.

In addition, we are fully capable of providing you with all kinds of Cryogenic Valves, special valves such as; non slam check valve & blow down valves & DBB.

### FITTINGS & FLANGES

We are one of the most trusted and renowned suppliers of quality products in Fittings & Flanges. AZTECH provides all kinds of fittings and flanges which gives our clients a direct source to precise components to optimize their project's performance.

The flanges & fittings are available in varied sizes & other specifications to cater to the varied requirements of our clients. By providing materials such as , Alloy , Stainless and carbon steel, Nickel based & copper, AZTECH is your best source for fittings & flanges.

# EQUIPMENT

## PROCESS EQUIPMENT

AZTECH has been serving the needs of companies worldwide with quality machining and fabrication services. A commitment to delivering high-end engineered shell and tube heat exchangers, plate heat exchangers, reactors, pressure vessels, towers and Internals (Tray) to a wide range of industries has been the cornerstone of our continued success.

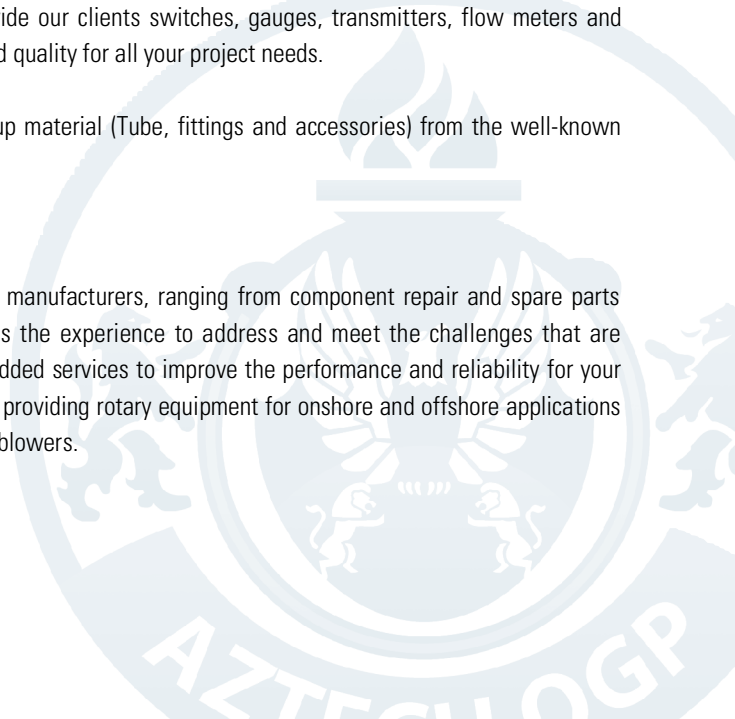

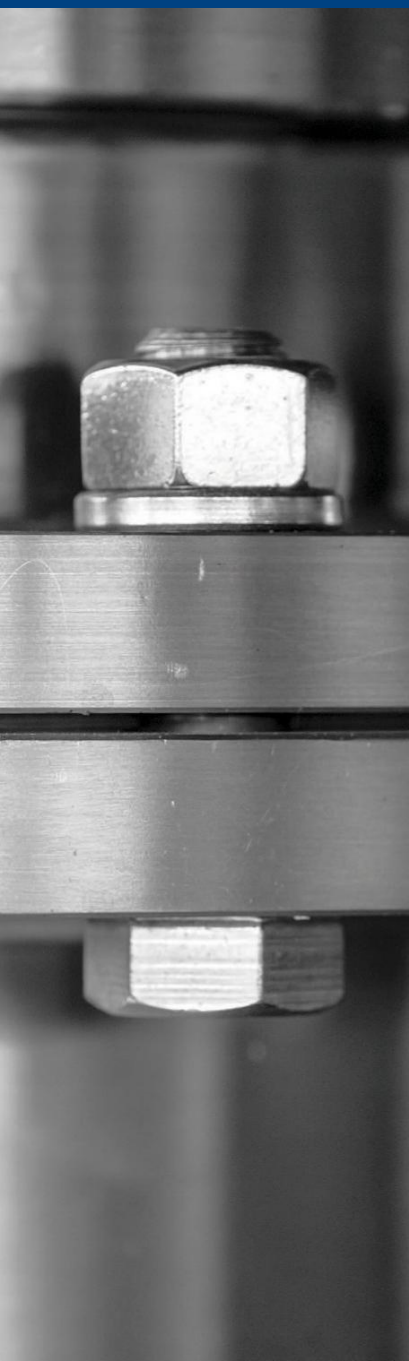

## INSTRUMENTS

AZTECH offers a wide variety of pressure measurement solutions ranging from simple to high end systems. Depending on the desired accuracy, range, and expense, you have several sensor options for measuring pressure and temperature. AZTECH offers a wide variety of devices for you to choose from to make pressure and temperature measurements. We proudly provide our clients switches, gauges, transmitters, flow meters and other instruments that deliver the precision and quality for all your project needs.

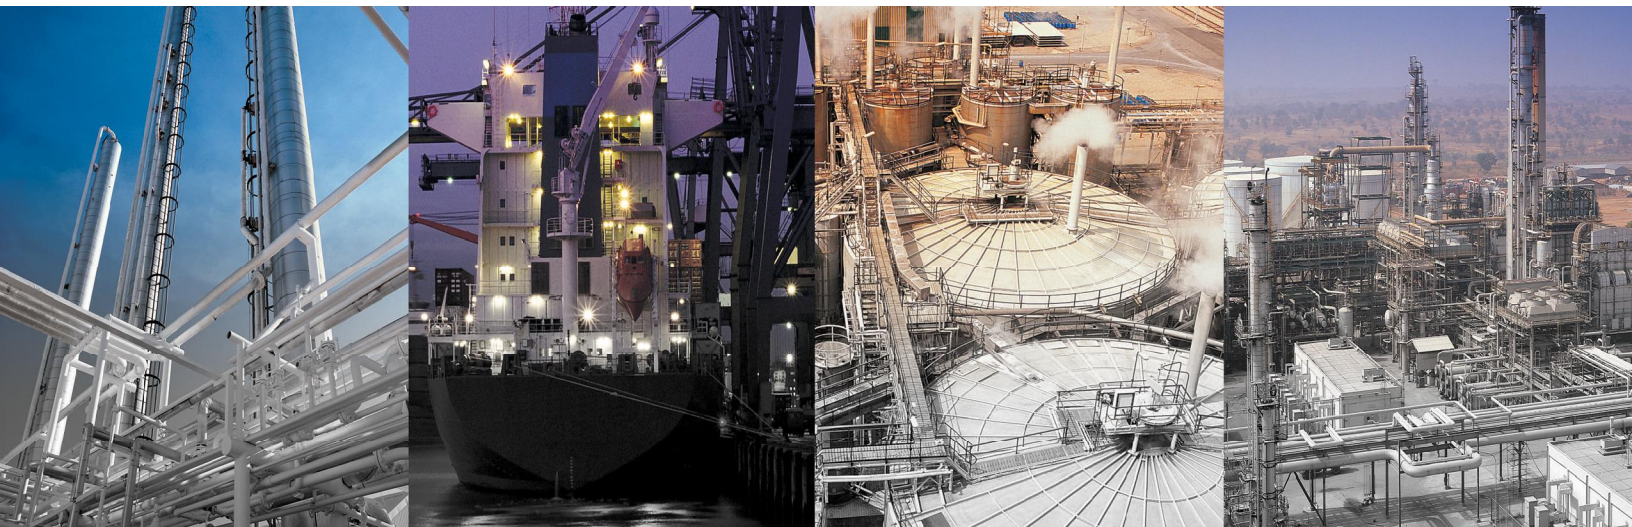

In addition, we can supply all kinds of hook up material (Tube, fittings and accessories) from the well-known manufacturers in the world.

## ROTARY EQUIPMENT

Based on our relationships we maintain with manufacturers, ranging from component repair and spare parts supply through to full workshop, AZTECH has the experience to address and meet the challenges that are unique to your operations. We deliver value-added services to improve the performance and reliability for your rotating equipment. Our core services include: providing rotary equipment for onshore and offshore applications such as compressors, turbines, fans, pumps & blowers.

# AZTECH SERVICES

- Fully conforming to client's procedures, policy's and approvals
- Prepare and issue RFQ packages for every project
- Direct pay on behalf of clients
- Expediting project's production
- Vendor data review and approval
- Inspection services at production facilities

## Estimating & Planning

Leverage of procurement price and lead time intelligence to maximize the accuracy of optimized estimates and schedules.

## Supplier Prequalification

Practical process applied to validate supplier capabilities maturity and reliability covering technology, employee skills, financials, sustainable development policies | capabilities etc.

## Expediting

Stringent set of expediting procedures applied by a worldwide network of expeditors aimed at achieving systematic timely delivery of equipment and materials.
